1. BUSINESS QUESTION & HYPOTHESIS

Jacob Phillips: wants to buy a house with these characteristics:

- Historic estate (year_build < 1950)
- Large lot (> 20000 square feet)
- 4+ bathrooms
- No waterfront location
- unlimited Budget

Business Question: Which properties best meet the client's requirements for a large, historic estate with 4+ bathrooms (or a smaller nearby alternative), featuring luxury amenities (tennis court and pool), proximity to golf, and explicitly excluding waterfront locations?

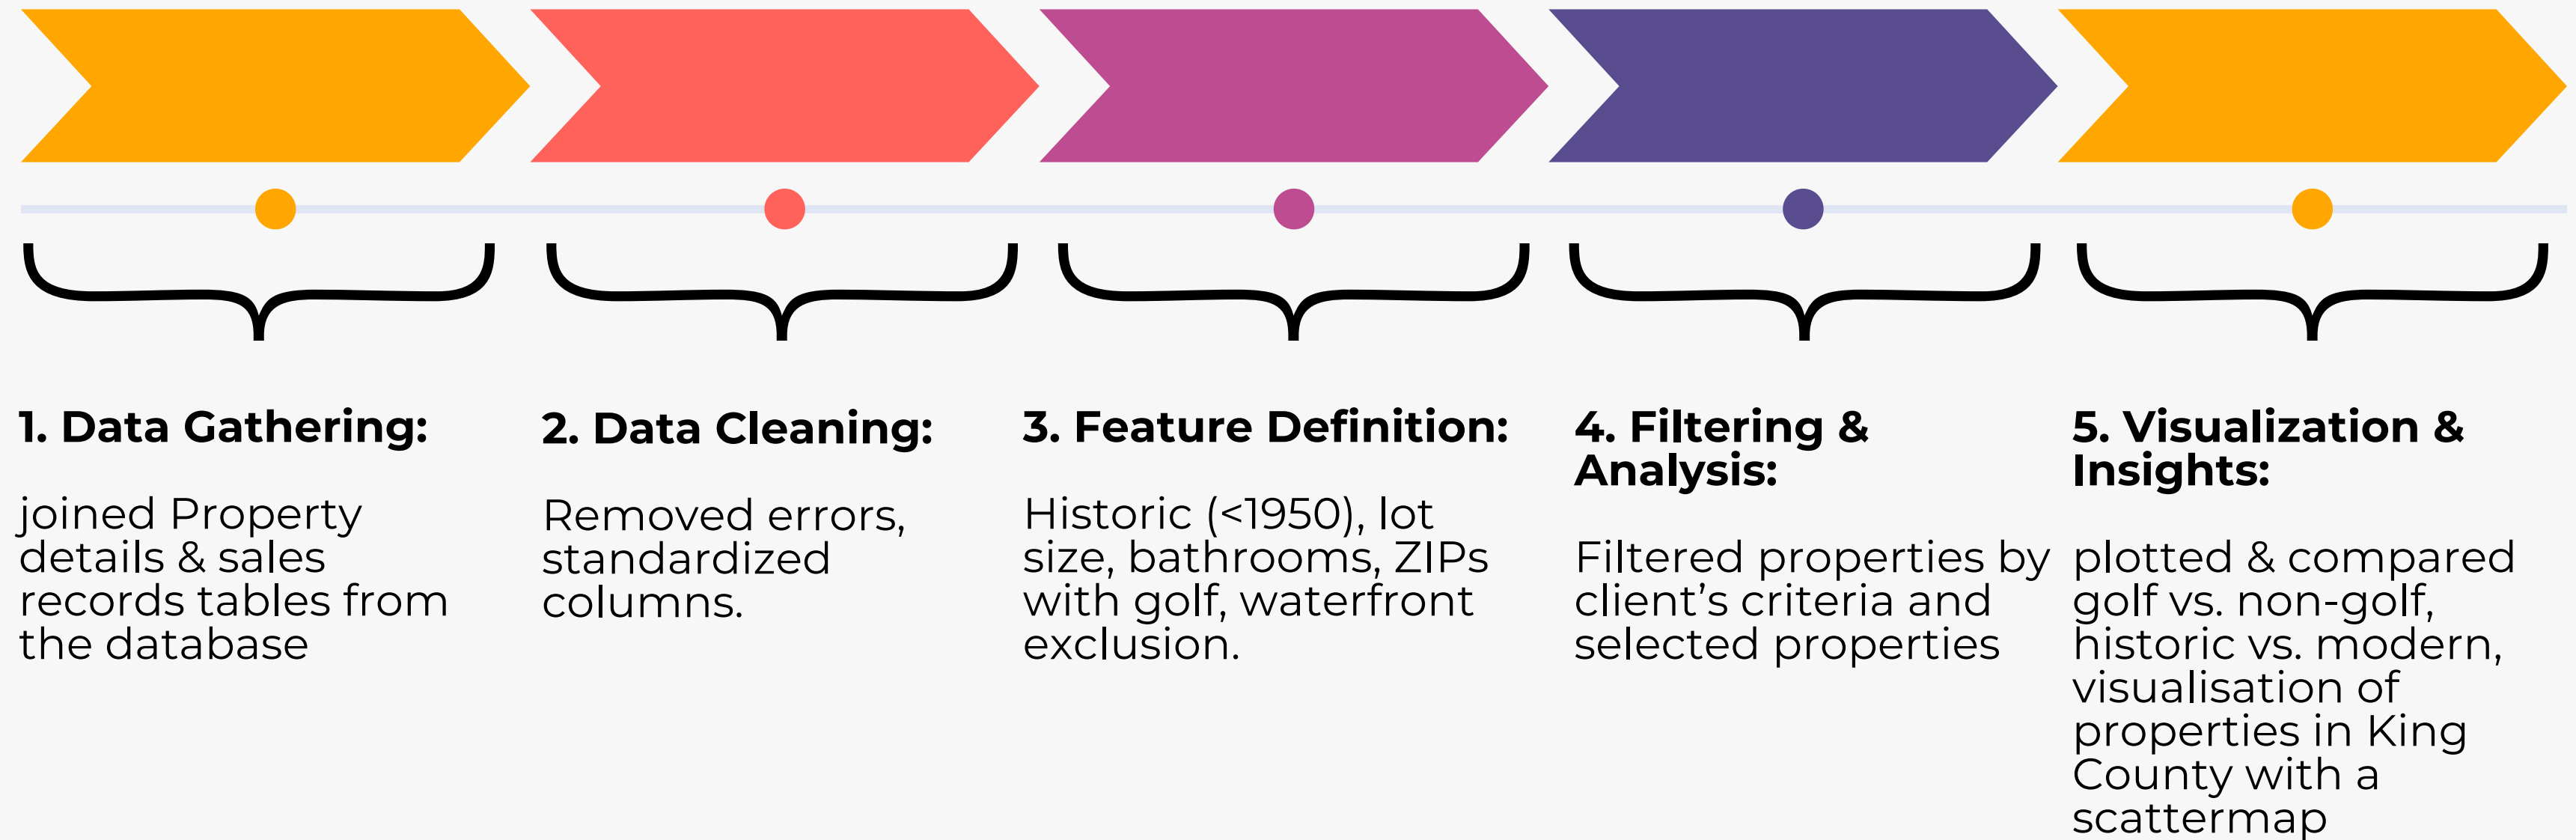

Hypothesis 1: "If a property is in a "golf community" zip code, then it will show higher average price per square foot than properties outside those areas."

Hypothesis 2: "The higher the average neighbor lot size, the more likely the property itself has a large estate-style lot, aligning with the client's outdoor amenity needs."

Hypothesis 3: If a property is historic, then it is more likely to be located on a smaller lot.

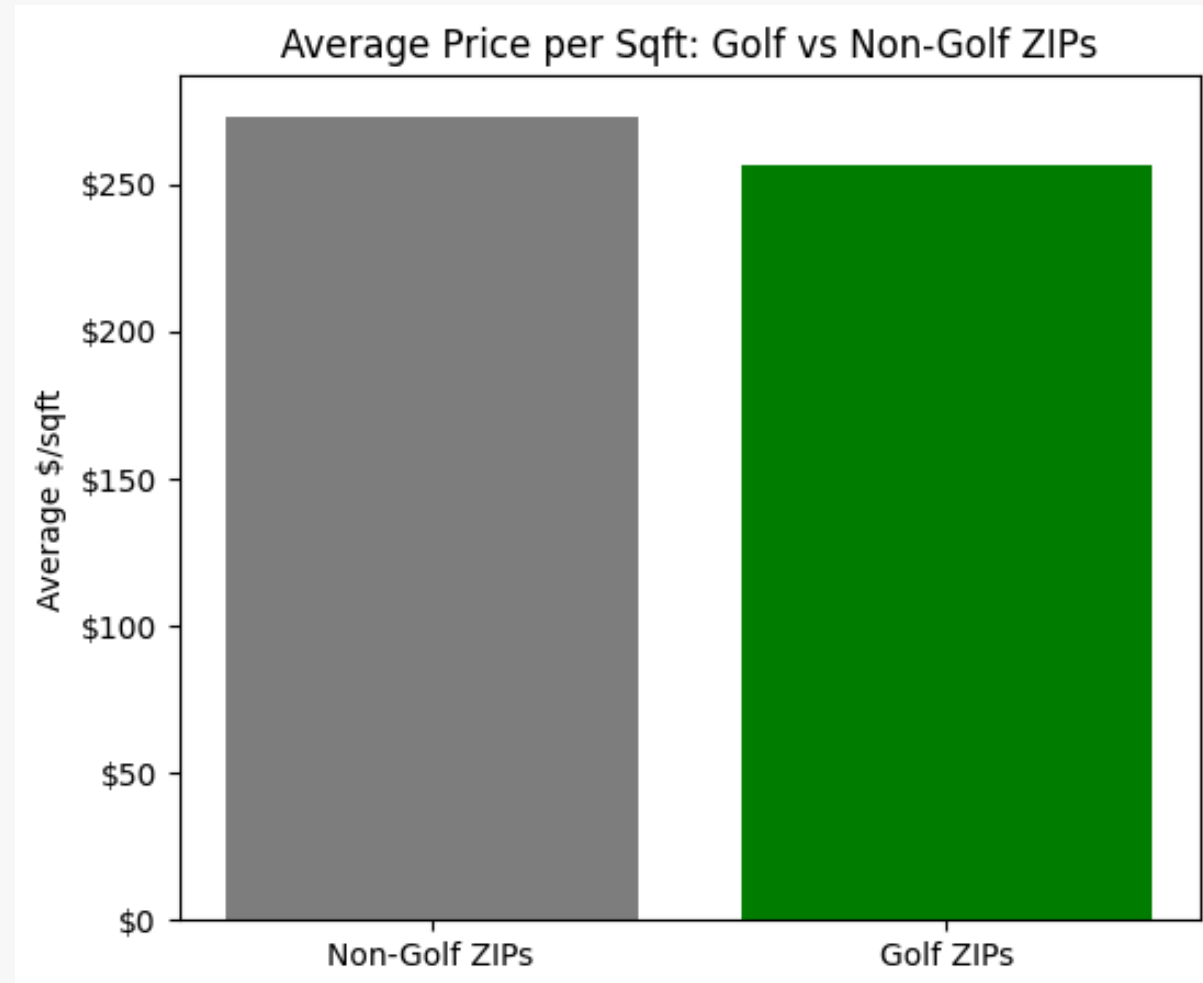

2.METHODOLOGY

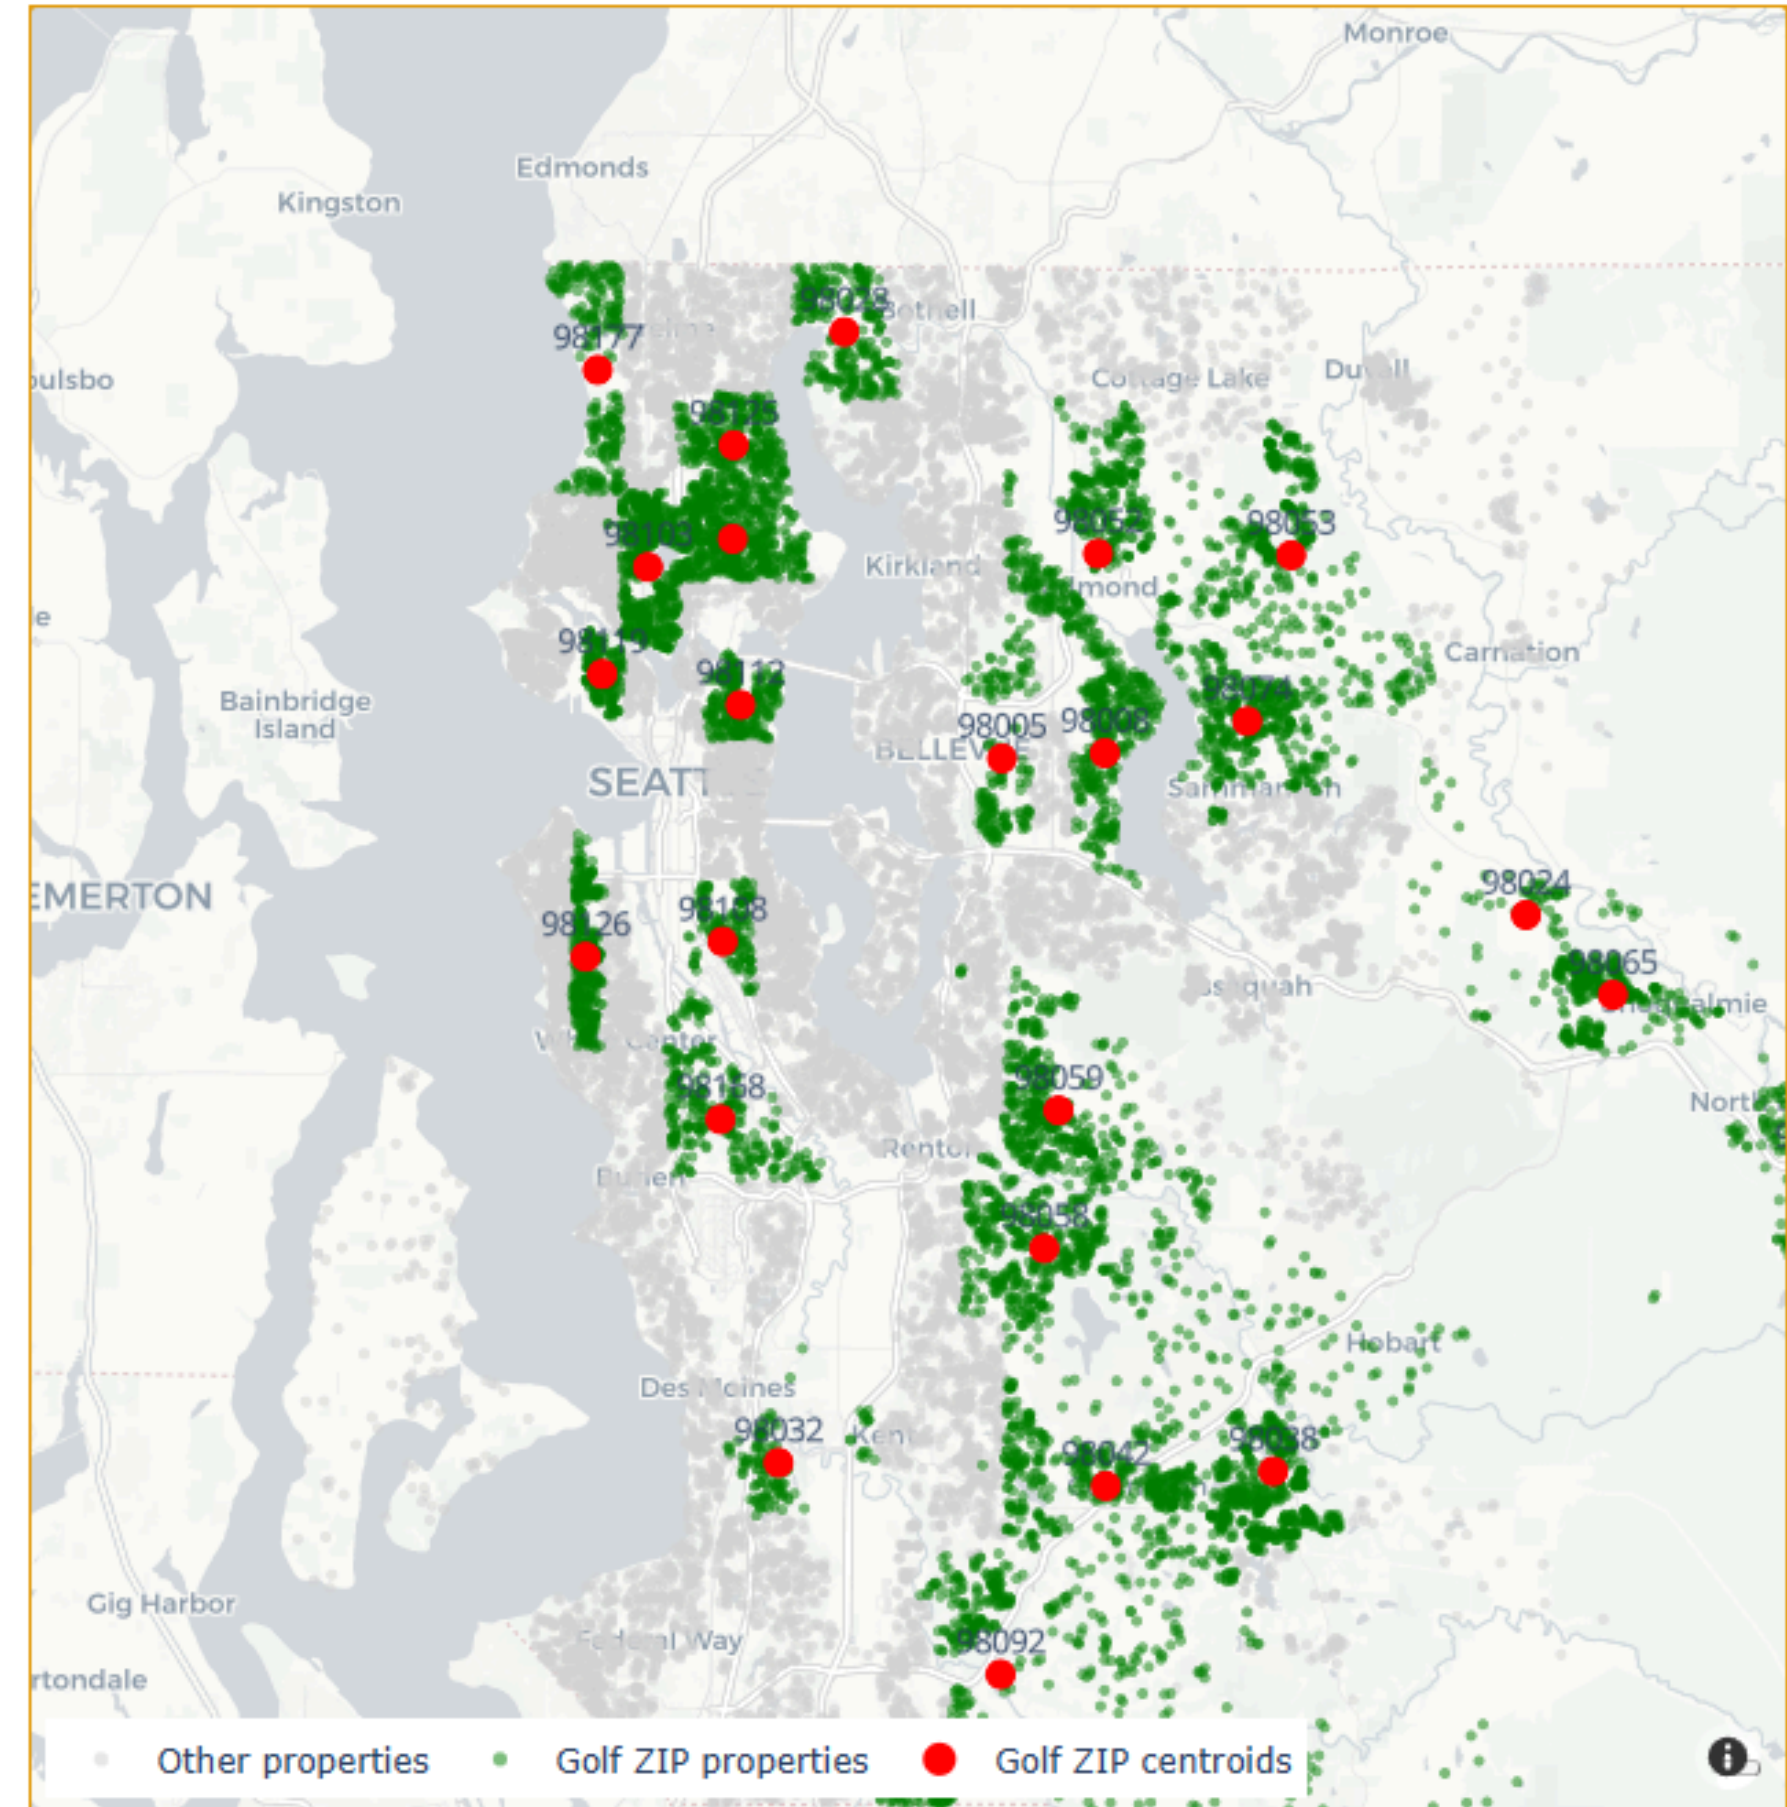

KEY INSIGHT #1

NON-GOLF ZIP-PROPERTIES SHOW HIGHER VALUE

- average price per sqft for properties located in the same ZIP-Code as Golf Courses < average price per sqft of non Golf properties
- 256.73 \$/sqft (Golf ZIP) < 273.22 \$/sqft (Non-Golf ZIP)
- **H1:** Properties which are located in a ZIP-Code of an Golf Course have a higher average price per sqft

Overview Properties: Golf ZIPs vs Others

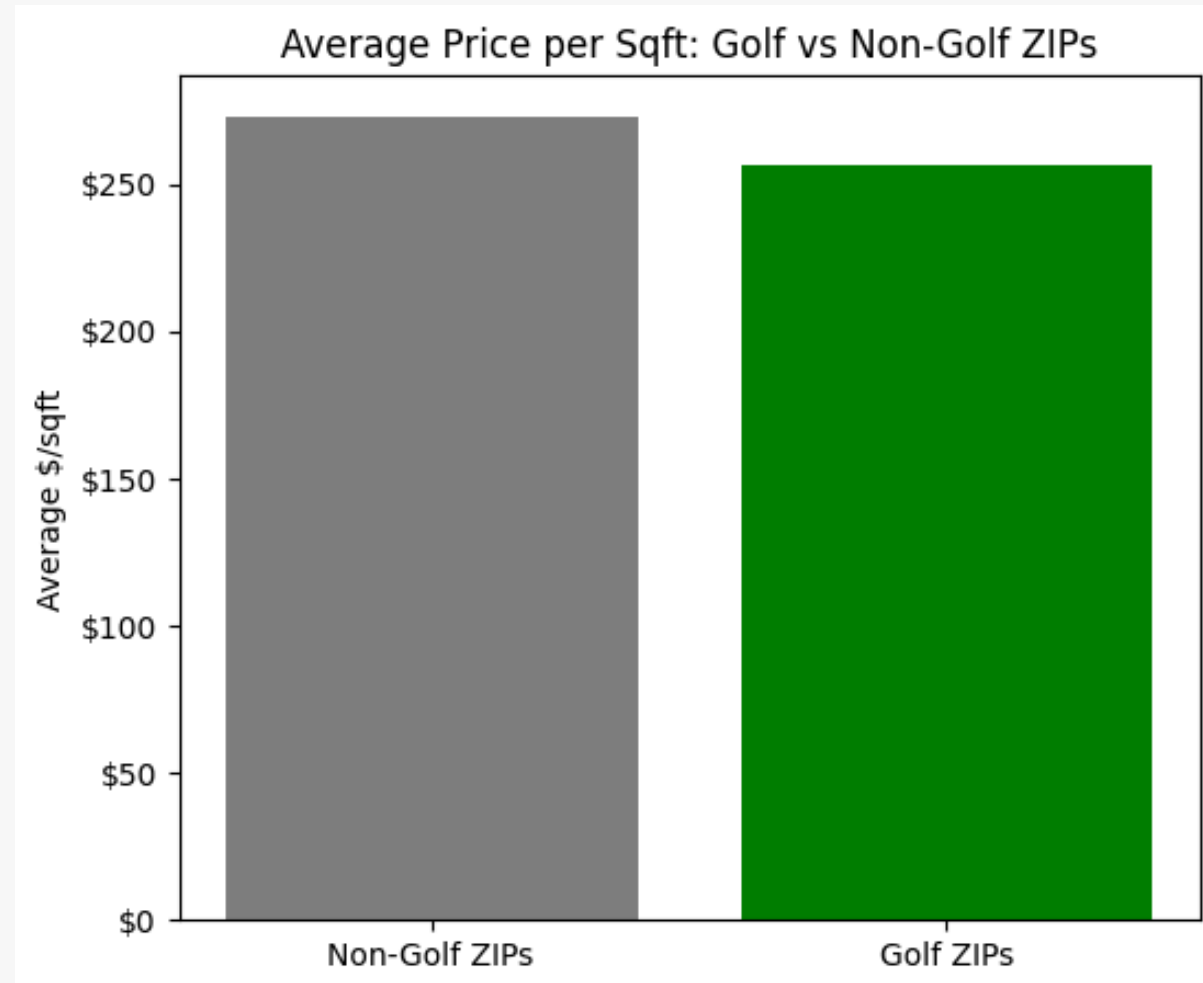

KEY INSIGHT #1

NON-GOLF ZIP-PROPERTIES SHOW HIGHER VALUE

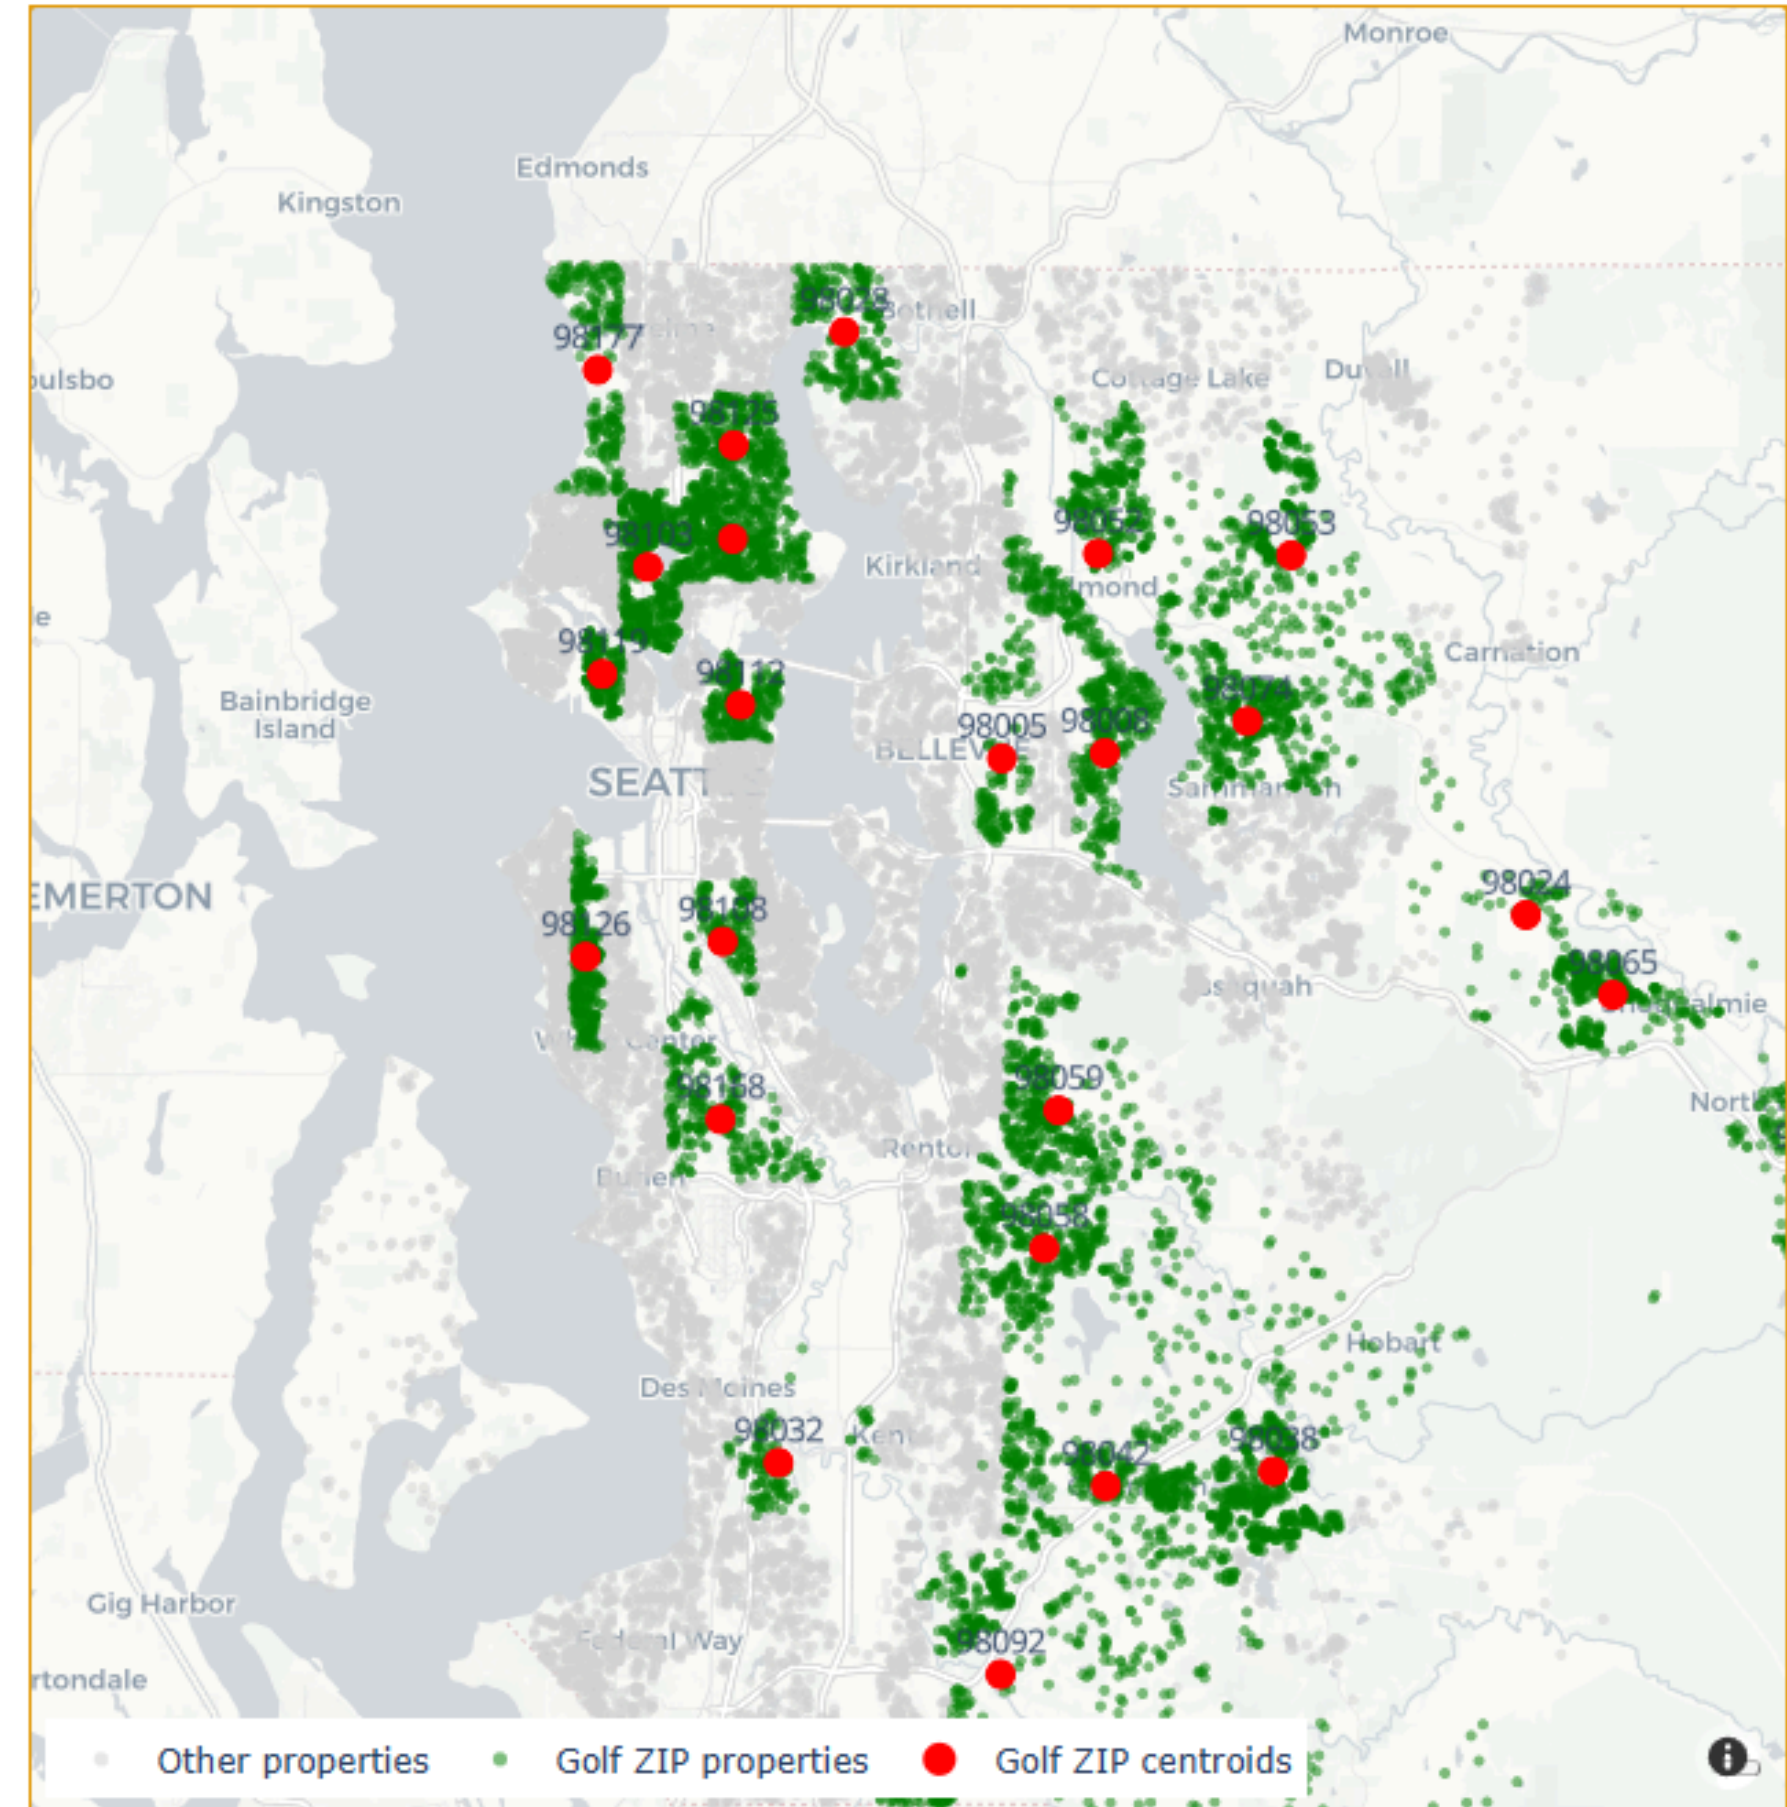

- average price per sqft for properties located in the same ZIP-Code as Golf Courses < average price per sqft of non Golf properties
- 256.73 \$/sqft (Golf ZIP) < 273.22 \$/sqft (Non-Golf ZIP)

H1: Properties which are located in a ZIP-Code of an Golf Course have a higher average price per sqft

✗ The results dont support Hypothesis 1.

Overview Properties: Golf ZIPs vs Others

KEY INSIGHT #2

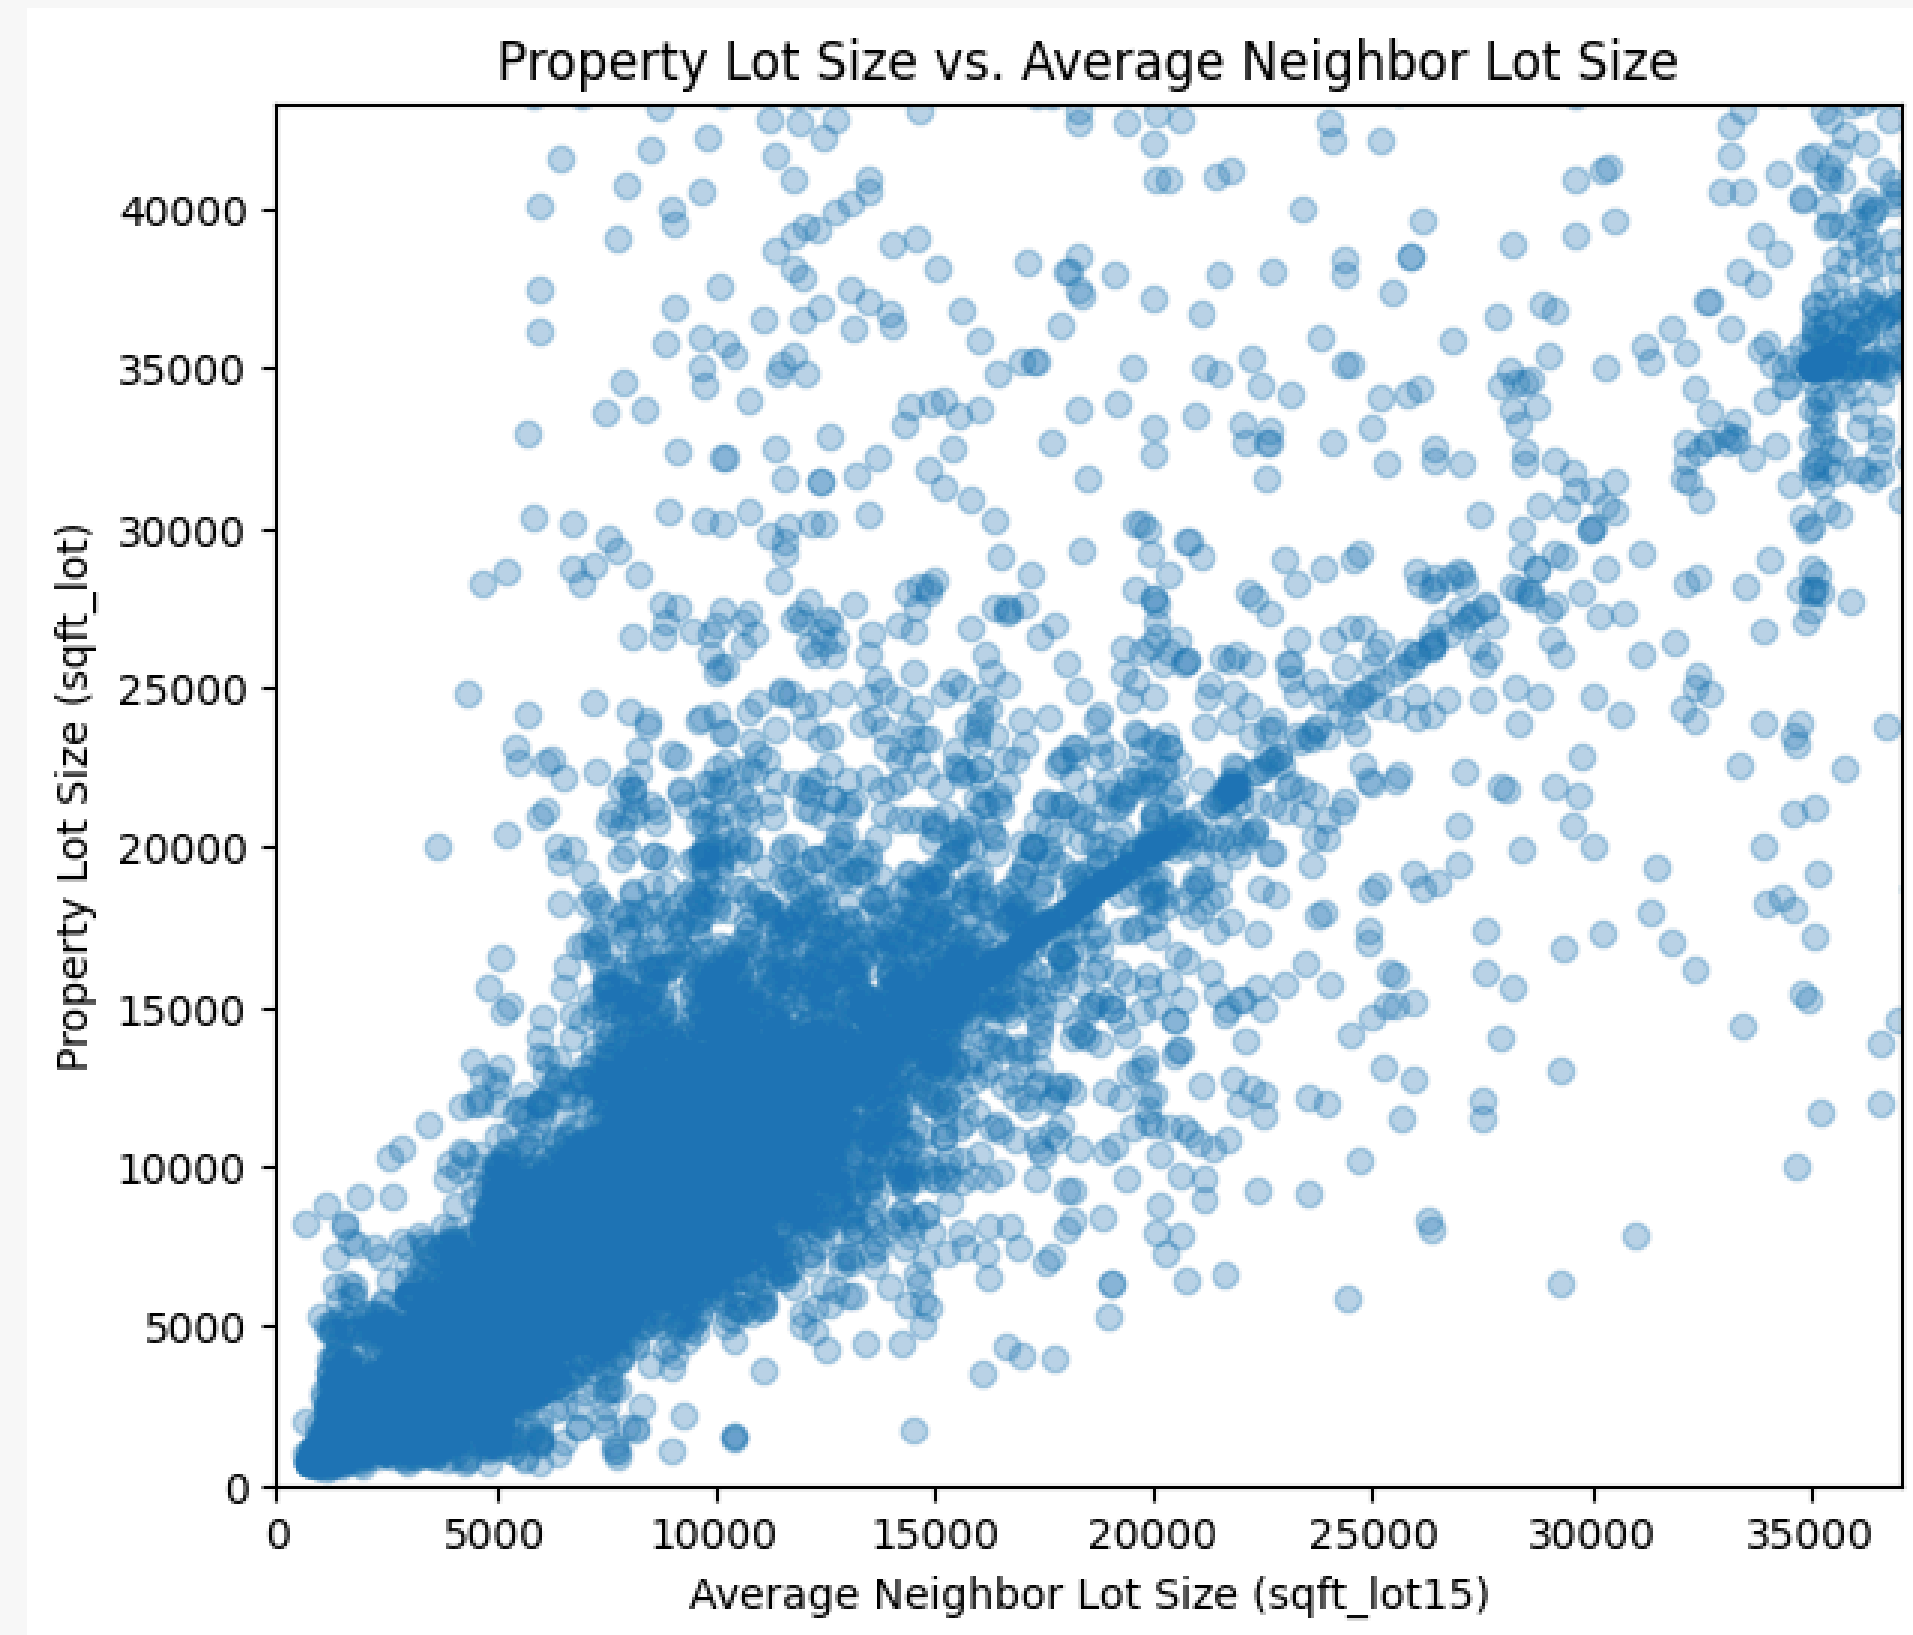

H2: THE HIGHER THE AVERAGE NEIGHBOR LOT SIZE, THE MORE LIKELY THE PROPERTY ITSELF HAS A HIGHER LOT."

Scatter-plot:

- plots show an upward trend (points clustering along a diagonal line).
- this indicates a positive correlation between lot size and average neighbor lot size

A positive correlation supports H2.

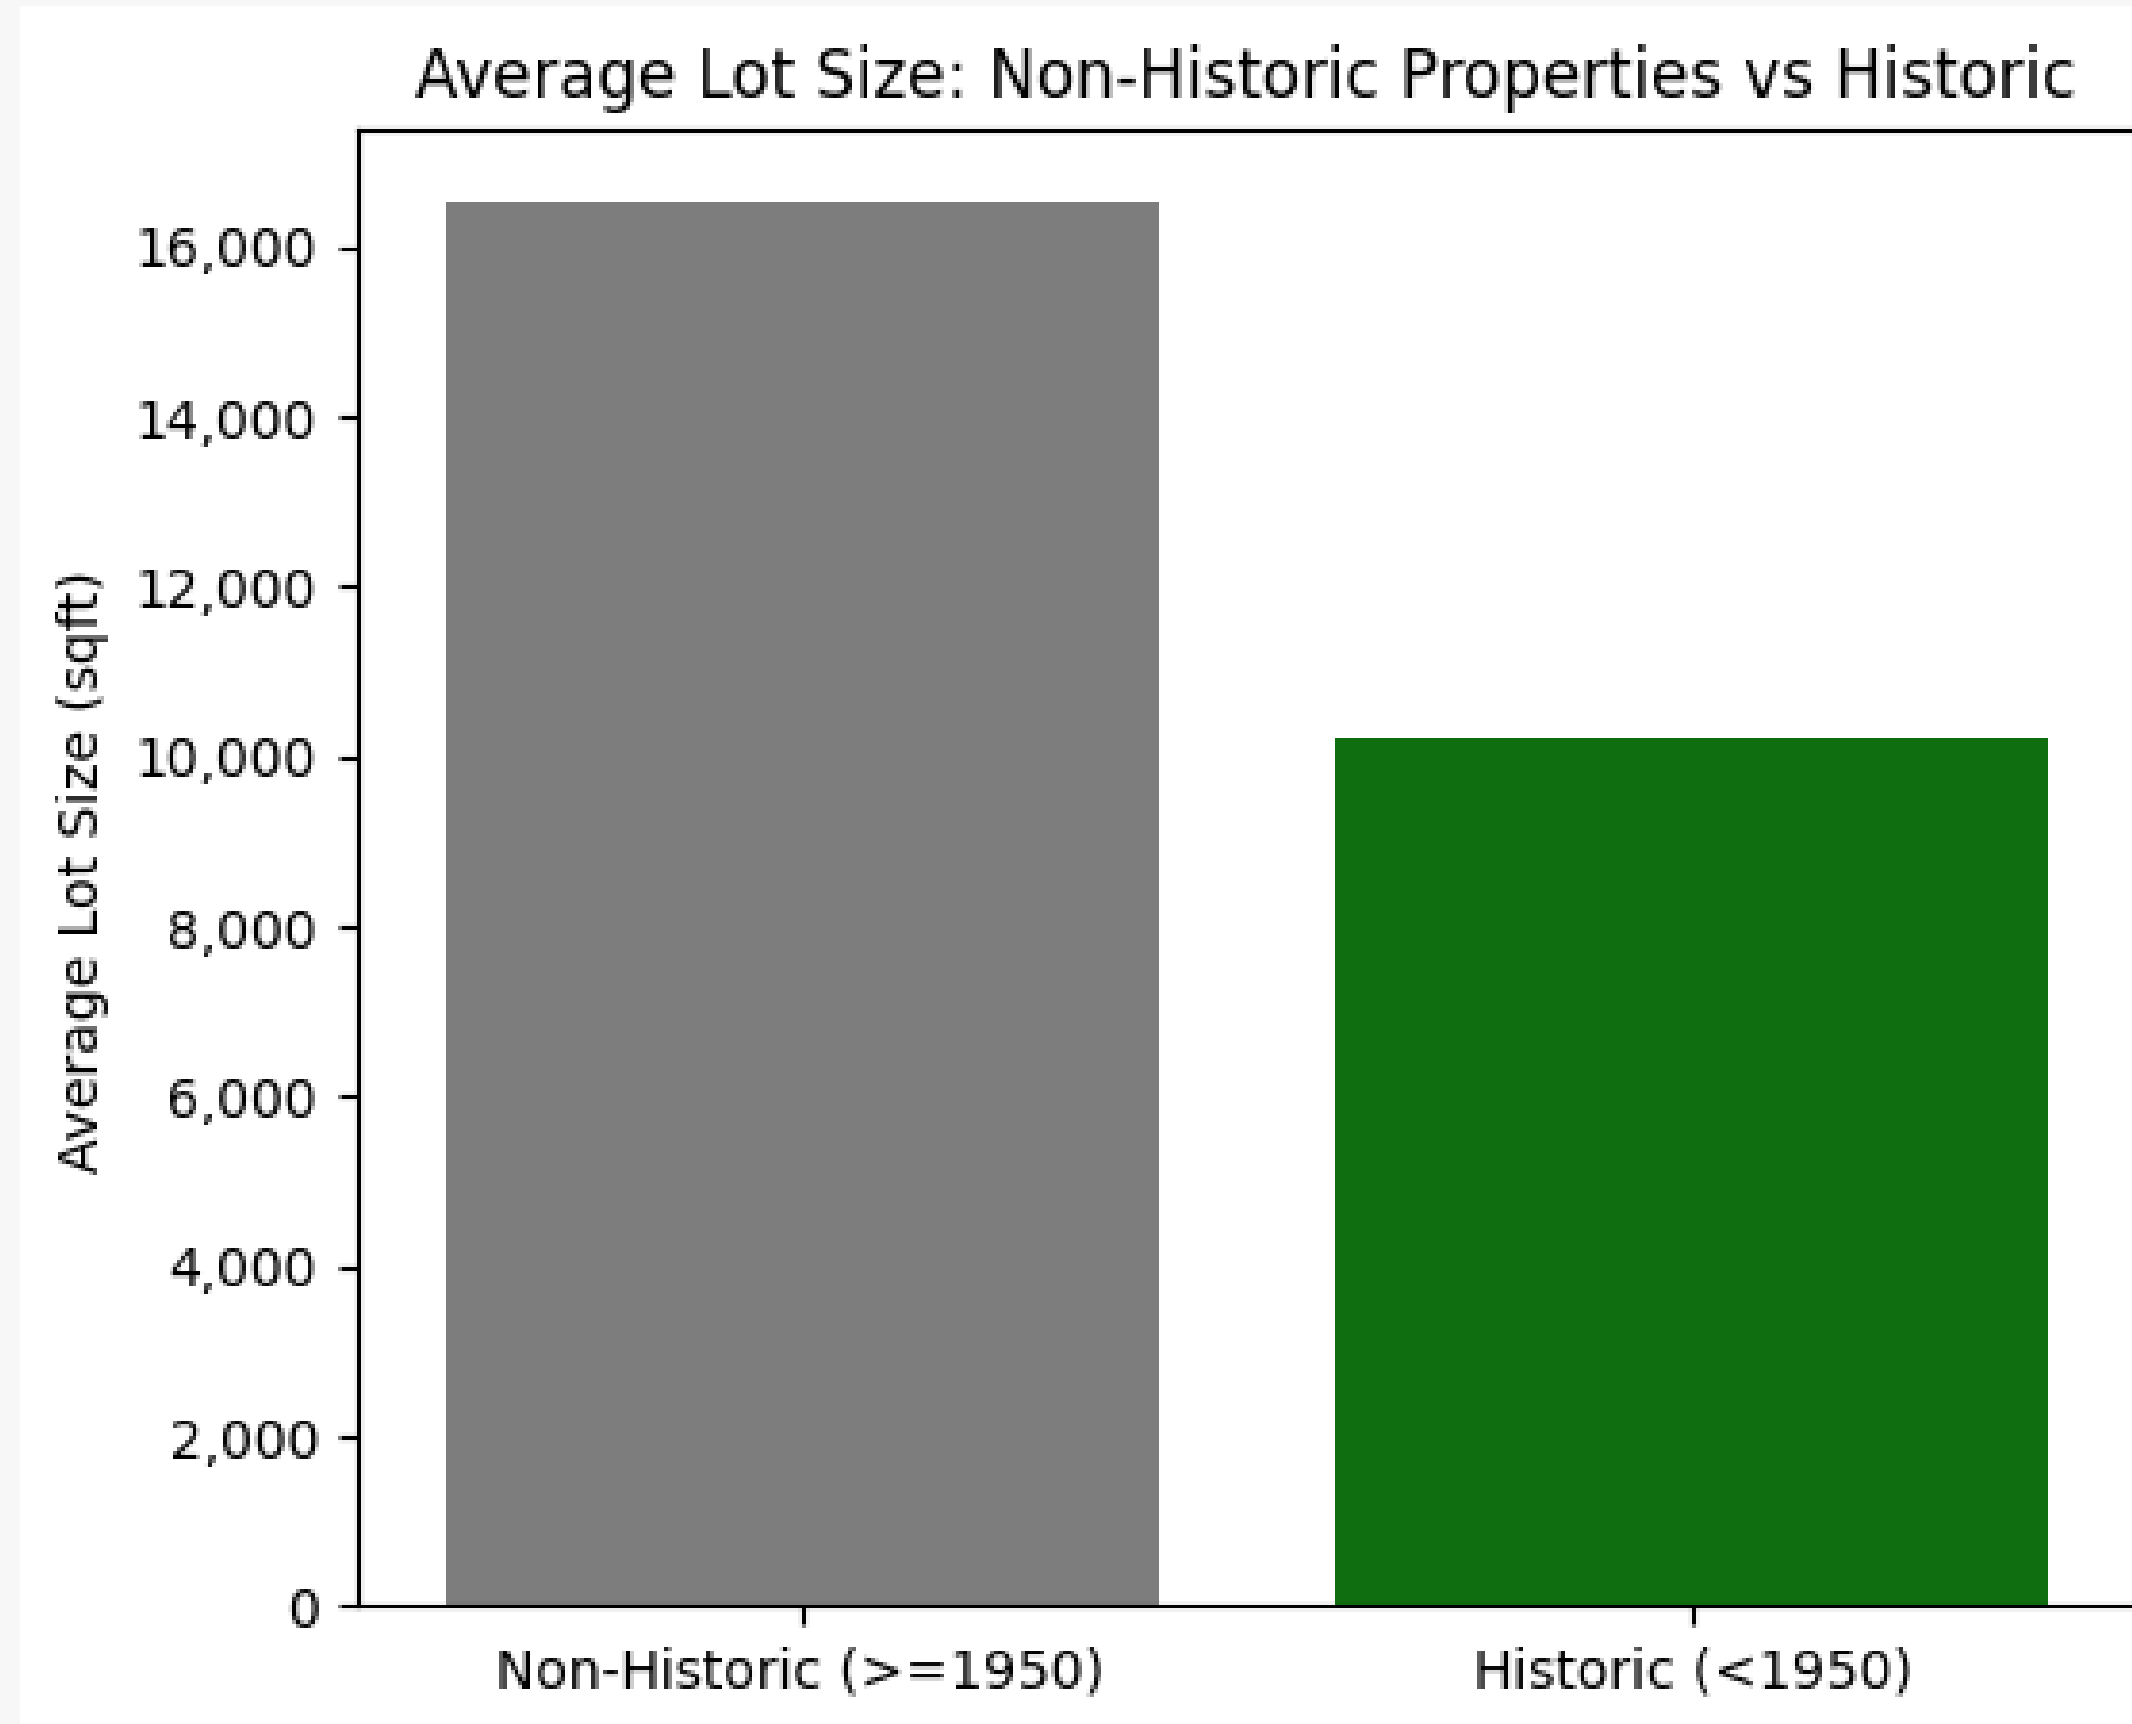

KEY INSIGHT #3

H3 HISTORIC PROPERTIES HAVE BIGGER LOTS THAN NON-HISTORIC PROPERTIES

- Avg lot size for historic (<1950): ~10k sqft.
- Avg lot size for non-historic (≥ 1950): ~16.5k sqft.
- Non-historic properties have more than 50 % bigger lot size on average

these results dont support H3

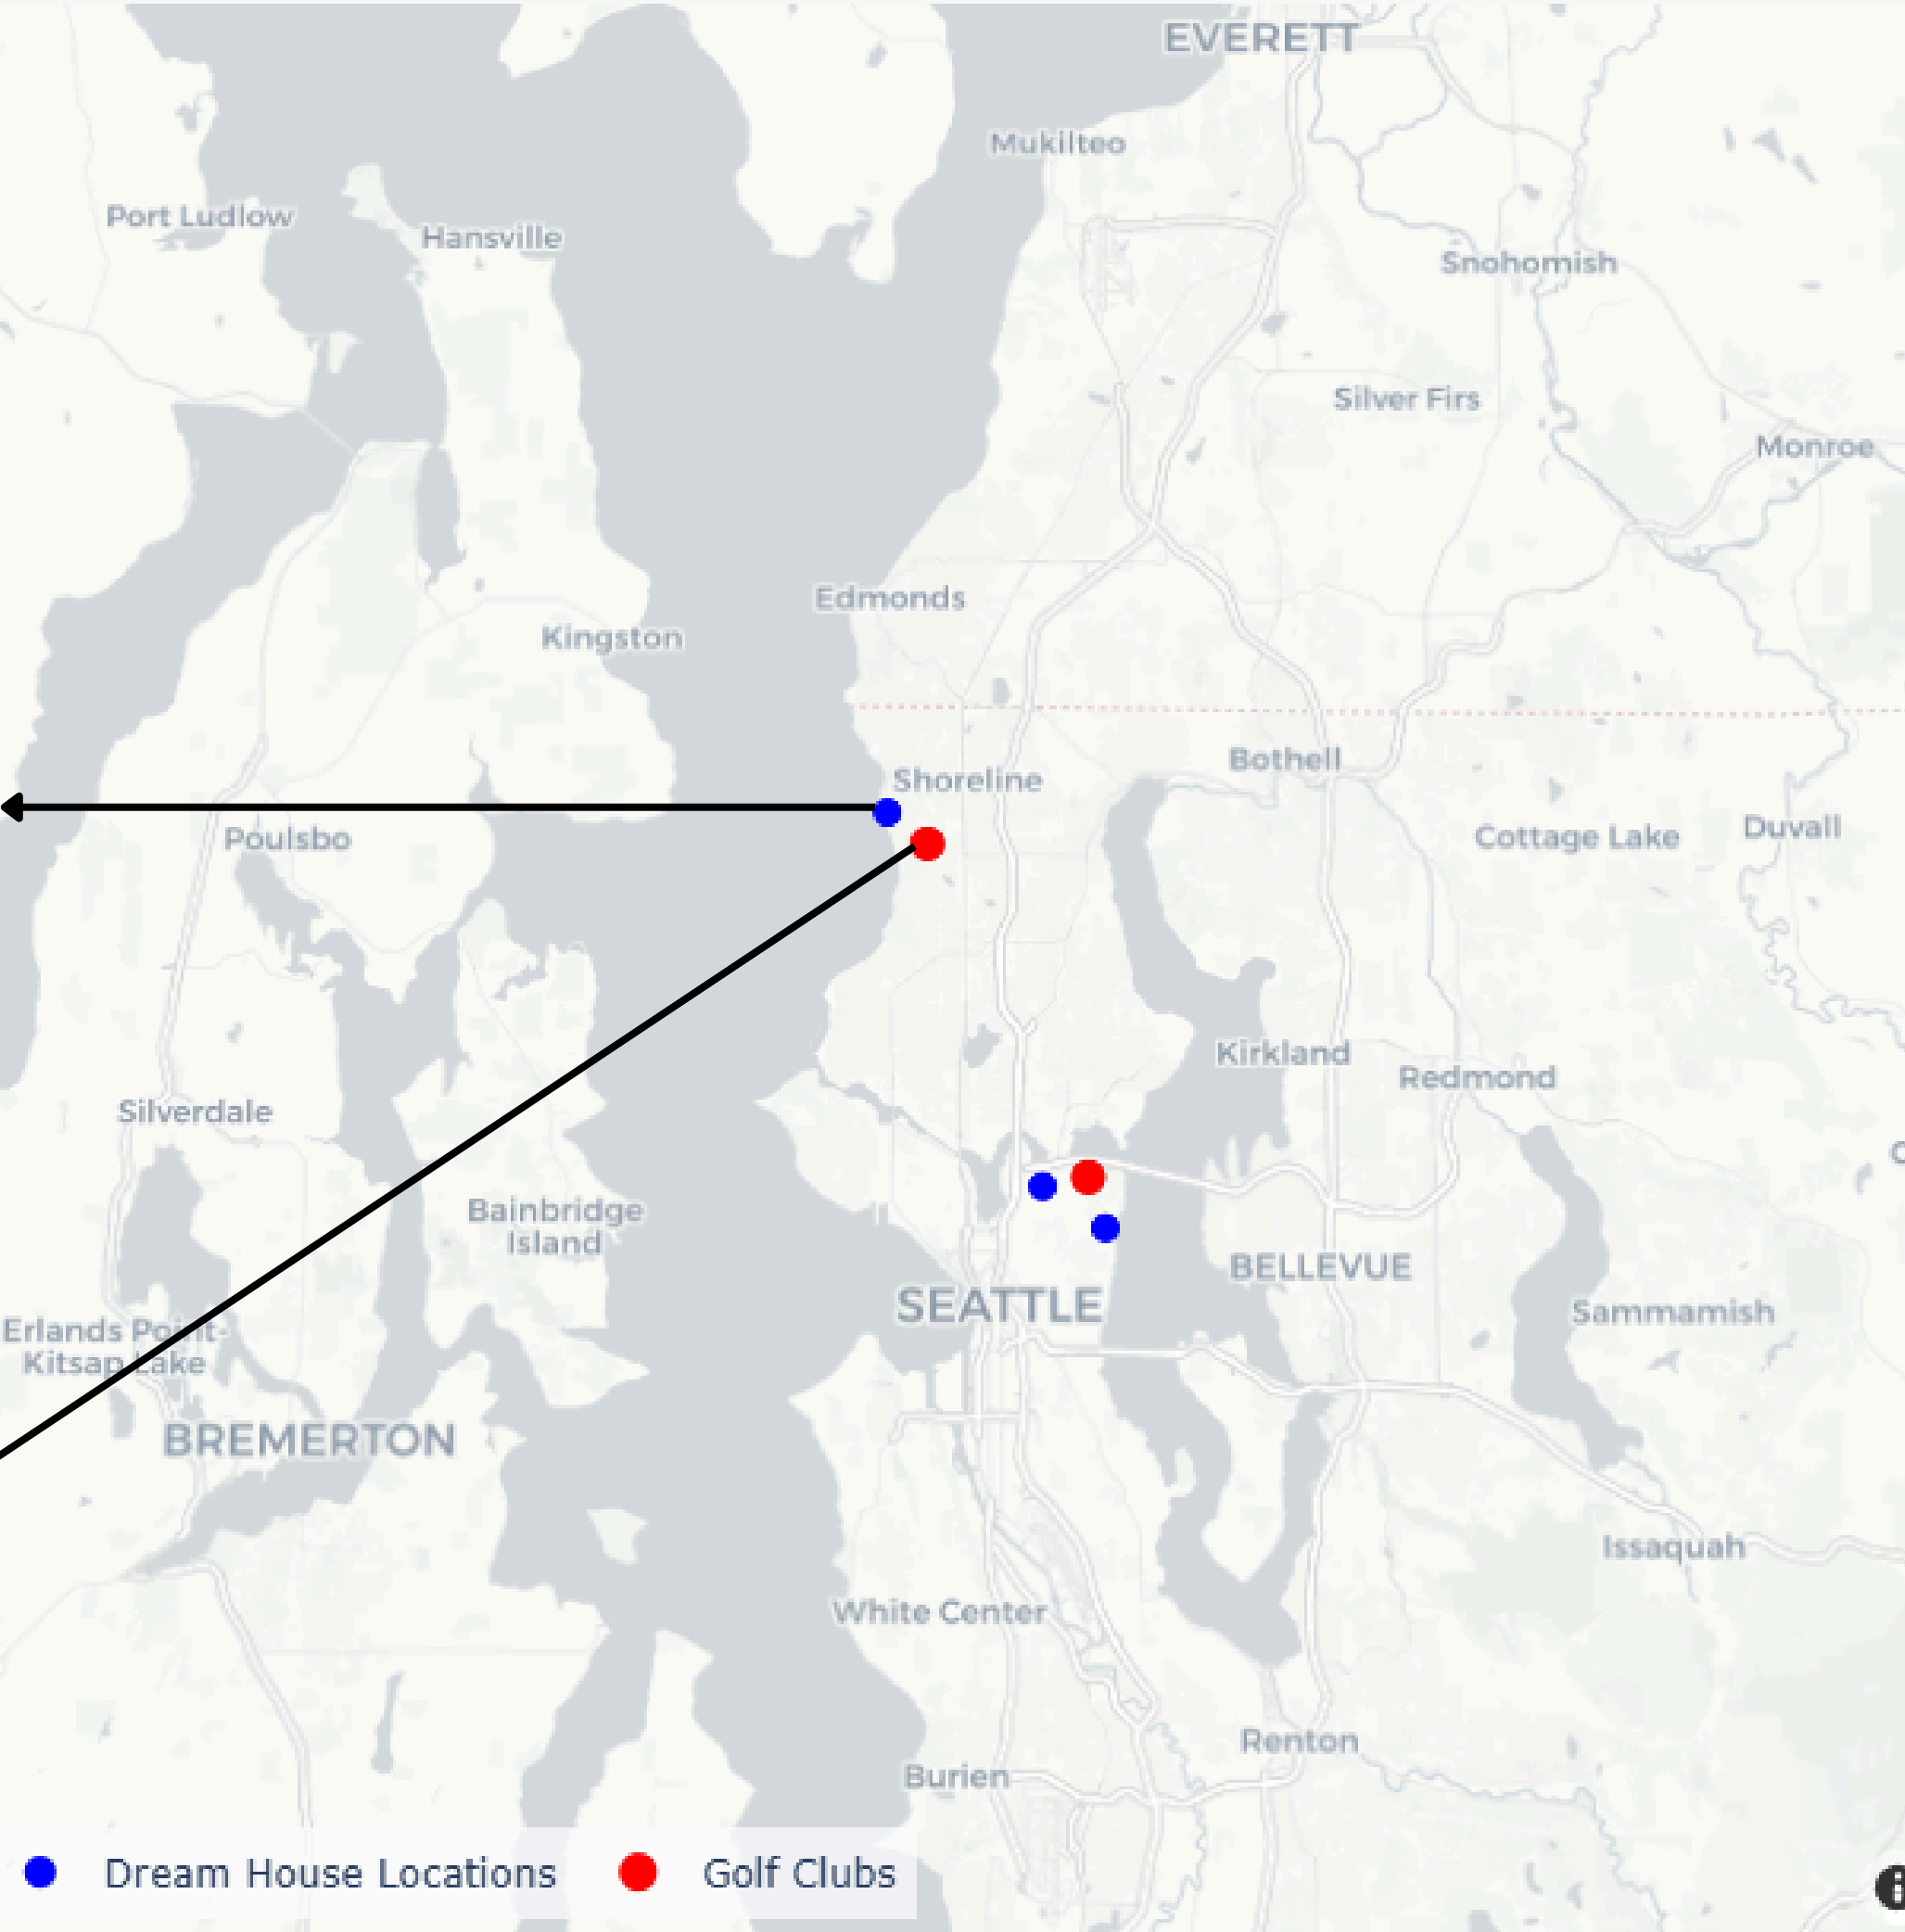

DREAMHOUSE

RECOMMENDATION

Object	House 1 ID: 3304700130
ZIP-Code	98177
Living space	3860 square feet
Lot size	67,953 sqft
Year build	1927
Bathrooms	4
Sale Price	1,760,000 \$

Seattle Golf Club

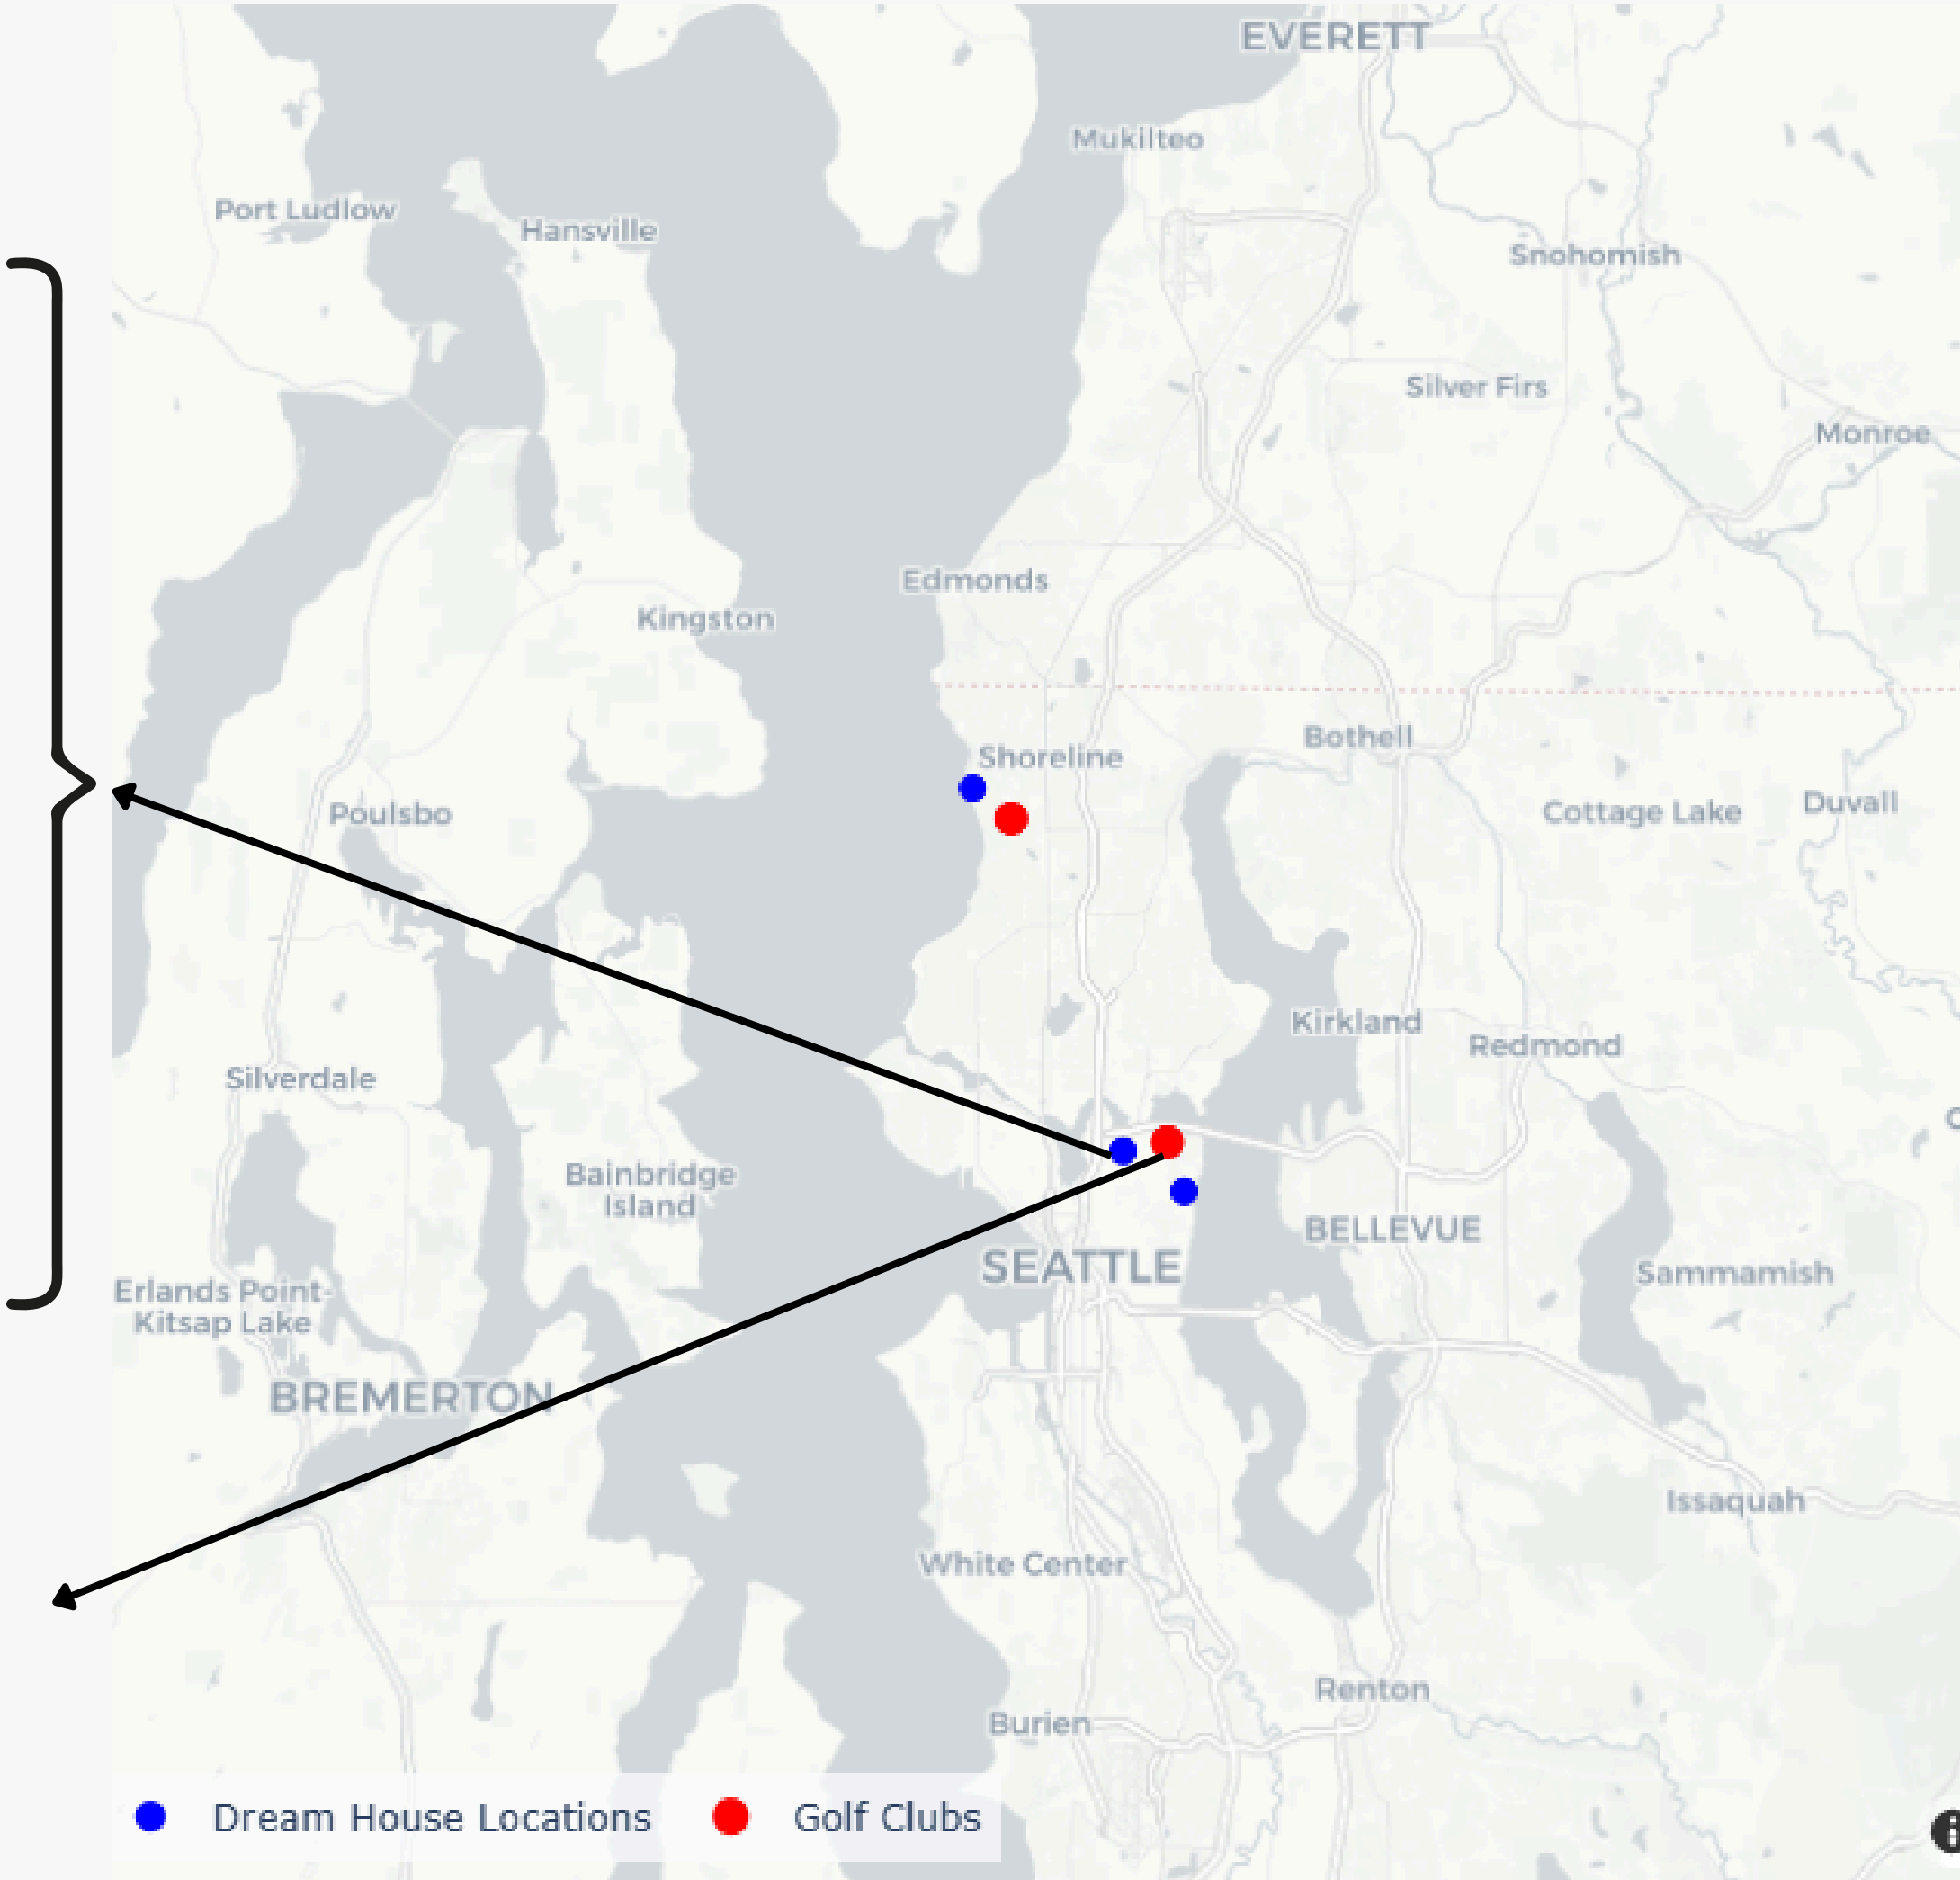

DREAMHOUSE

RECOMMENDATION

Object	House 2 ID: 1333300145
ZIP-Code	98112
Living space	4200 square feet
Lot size	30,120 sqft
Year build	1933
Bathrooms	4
Sale Price	2,230,000 \$

The Broadmoor Golf Club

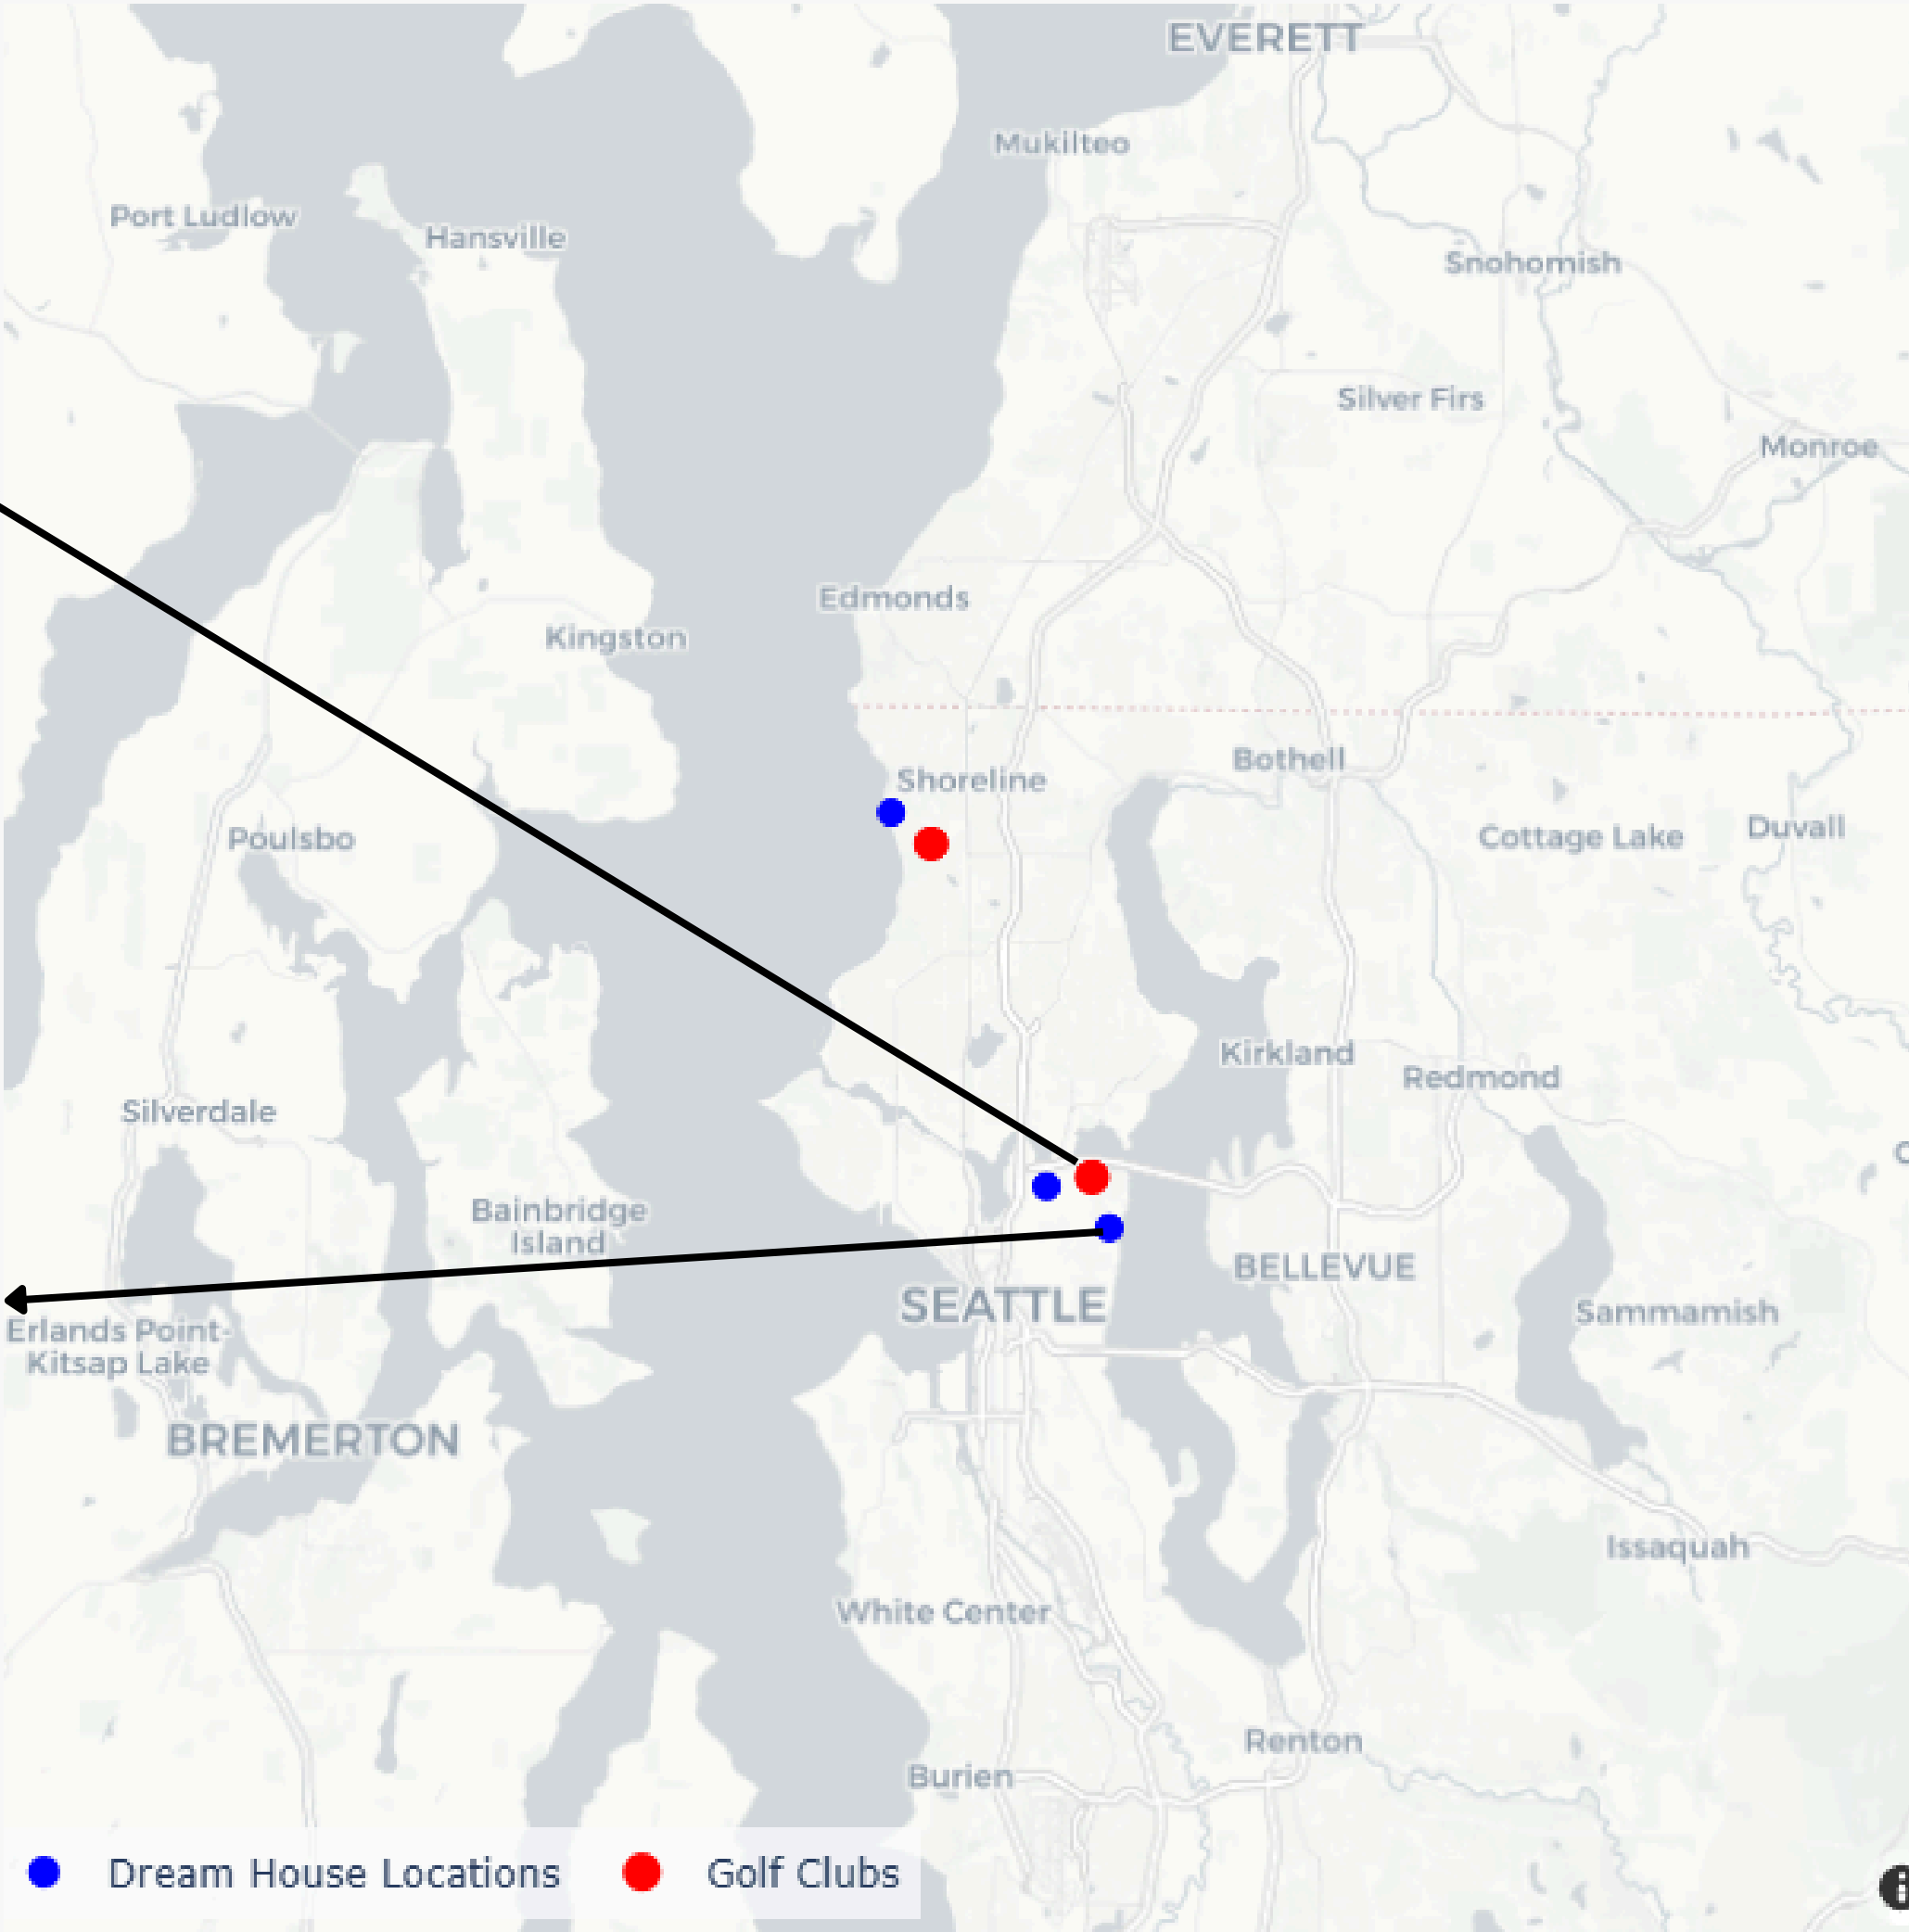

DREAMHOUSE

RECOMMENDATION

The Broadmoor Golf Club

Object	House 3 ID: 5317100750
ZIP-Code	98112
Living space	4,575 square feet
Lot size	24,085 sqft
Year build	1926
Bathrooms	4.75
Sale Price	2,920,000 \$

THANK YOU
